

It's time to school termites with a green chemistry lesson.

Protect your home and your world.

The Sentricon® system kills the termite queen and her colony. Your home, your water, your land and your family remain protected. Protected against these deadly neighborhood destroyers.

The Sentricon system uses smart, proven green technology, specific to termites, including tamper-resistant in-ground bait stations. And that's all the assurance you need.

No queen. No colony. No kidding.

**GREEN CHEMISTRY
SMART SCIENCE
PROVEN RESULTS**

**There's a good kind of termite.
A dead one.**

Complete destruction of the termite queen and her colony. That's what you get with the Sentricon® system – and you can do it without compromising the environment. The original Sentricon system is the only pest control product ever to earn the Presidential Green Chemistry Challenge Award, presented by the U.S. Environmental Protection Agency.

The Sentricon system works by exploiting natural termite behavior. They forage. They find the bait. They eat the bait. When they eat it, they can't molt. When they can't molt, they die. Effectiveness that's house-friendly and termite-deadly.
